DETAILED ACTION

1. Claims 1-16, and 24-34 have been canceled by the Applicant dated 11/23/04.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 16 is rejected under 35 U.S.C. 102(b) as being anticipated by McShane et al. (US 5,049,526).

McShane teaches in claim 1, a method of manufacturing a semiconductor device, including the steps of: attaching a semiconductor die 104 to a substrate; positioning a housing on the substrate, in a position surrounding the die; positioning a mold over the housing such that an upper surface of the housing abuts against an inner surface of the mold; and injecting (or filling) into the mold a molding material.

Allowable Subject Matter

3. Claims 17-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The applied reference fails to teach and/or suggest the method of claims 17-23.
